```
Technolgies used
================
DispatcherServlet(InbuiltController)
1. Controller(plain java class)
2. Service(plainjava class)
3. DAO(spring-datajpa)
4. View part(Html,Css,JSP)

Customer-RelationShip-Manager Project
=====================================
 1.CreateCustomer(save(Customer))
 2.ReadAllCustomer(findById(customerId))
 3.UpdateCustomer(save(Customer))
 4.DeleteCustomer(deleteById(customerId))

                                          (Spring-data-jpa)
Controller=========> Service==========>DAO=====================>Database

Try on our own
==============
=> I18N
=> Pagination

            refer:: BootMVCProj8-MVC-CRM-CRUDAPP

Thymeleaf
=========
 a. In pom.xml add the starter files

<dependency>
      <groupId>org.springframework.boot</groupId>
      <artifactId>spring-boot-starter-thymeleaf</artifactId>
</dependency>

b. Keep the view components inside src/main/resources/templates
            templates
                  |-> customers
                              |=> customer-form.html
                              |=> list-customers.html

c. Keep index.html as the landing page,keep it src/main/resources/static
      <meta http-equiv="refresh" content="0; URL='customer/list'" />
```
